

Flush partition walls with flexible folding.

Hardware system for large wooden folding walls with panel weighing up to 80 kg (176 lbs.).

Description

Hawa Variofold 80 H is a hardware system for wooden folding walls with up to 80 kg (176lbs.) heavy panels. Installations are simple to plan, and quick to assemble. A pivot bearing secures the first panel in the set; the others line by means of elegant, stainless steel hinges that bring the panels closer together and minimise panel stacking space requirements. The panel set and the opposing end may also have a pivot door fitted. Attached to every other panel is a folding-/pivot door catch with an integrated, individually adjustable retainer, to hold the folding wall flush when closed.

With Hawa Variofold 80 H, panels are guided in a bottom guide channel. Installations with two panels on either side and up to 3,6 m (11'9 $\frac{3}{4}$ ") wide are also possible without a bottom guide channel. A bar bolt lock operated at handle height keeps out unwanted visitors. Alternatively, an unobtrusive deadbolt lock fitted to the bottom edge of the panel provides almost invisible locking.

Applications

Any situation where a simply operated, high-quality folding system is needed to partition a room. Equally suitable for residential and commercial settings, e.g. shopping centres, airports, hotels, restaurants and banks. 2-piece thoroughfare doors in place of conventional hinged doors are most convenient in living space designed for handicapped people.

Installation examples

One-sided installations filling an aperture up to 6000 mm (19'8 ⁷/₃₂") width are possible using the 2-panel basic sets, supplementary and pivot door sets – or double this figure for two-sided installations. Hawa Variofold 80 H requires a bottom guide channel, except for 2 or 2 + 2 panel installations.

Installations with a bottom guide channel

These examples illustrate just some of the possibilities.

Running tracks

Caution: Hole positions vary		mm/inch	code
	Running track alu, plain anodized, predrilled	6000 (19'8 $\frac{7}{32}$ ")	16852
		cut to size	16853

Bottom guide channel

Hinge

		code
	Stainless steel hinge with heavy load bearings WNR 1.4401/AISI 316, incl. fixing screws	23271
Quantity of hinges per panel joint: Panel height ≤ 2500 mm (8'2 $\frac{7}{16}$ ") = 2 pcs. Panel height ≤ 3500 mm (11'5 $\frac{13}{16}$ ") = 3 pcs.		

Hollow seal

		code
	Hollow seal, rubber black	Roll of 10 m (32'9 $\frac{23}{32}$ ")

Hinge

High loadbearing capacity means that panels up to 2500 mm (8'2 $\frac{7}{16}$ ") tall require just two hinges.

Hinge positions

Hollow seal

Hollow cross-section seal strips eliminate the problem of light penetrating through gaps between panels.

Hollow seal positions

Folding-/pivot door catch

Every other panel has a folding-/pivot door catch (20426). Panels can thus be held flush in position without operating a locking mechanism.

Wall attachment

Hawa AG recommends a compensation strip for optimum wall attachment. In combination with hollow seal code 19657, this results in the elimination of the light gap and reduces draughts to a minimum. Doors that close directly against the wall must have 6 mm ($\frac{1}{4}$ ") clearance.

Version B
